

AVIATOR Smart Watch
with additional Silicone band
AVSW9516*

User Manual

Warranty

Your Aviator F-Series smartwatch is made and tested to exacting standards. We warrant to the original consumer that the smartwatch will be free from defects in materials and workmanship under normal use for a period of two (2) years from date of purchase. During this period, the smartwatch will be repaired or replaced (at the sole discretion of Aviator F-Series smartwatches) free of charge, if it proves to be defective in material or workmanship under normal use. This guarantee does not affect your consumer rights.

Water Resistance

Your Aviator F-Series smartwatch is suitable for everyday use and can withstand perspiration, drops of water when washing the face and very small amounts of moisture in daily activities. Not suitable for showering, rainfall & any other water or water sport activities.

Service and Repairs under Guarantee

IMPORTANT-Not covered by Guarantee:

1. Batteries, straps and bracelets
2. Damage caused by accident, misuse or lack of care
3. Water penetration (see Water Resistance)

If your smartwatch requires attention under the terms of the guarantee, then please post your smartwatch together with the Retailers Sales receipt or Proof of Purchase, the completed Guarantee slip on the back cover of this booklet and with a brief explanation of the nature of the fault, by Registered Post or recorded delivery to your nearest service centre.

Introduction - Thank you for choosing our product Aviator F-Series smartwatch AVSW9516*

Setting Up Your Aviator F-Series Smartwatch AVSW9516*

The first step is to download and install the AVIATOR Smart F Series App in your mobile from the QR code on your box, watch or manual & create an account to sync the information.

IMPORTANT! Before using the smartwatch, please peel off the protective film from 3 places as follows -

- 1) front of the smartwatch
- 2) back of the smartwatch
- 3) top of the charging dock

Charging Instructions

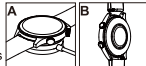

Charge your watch fully for the first time before use. Before every charge, clean the surface of the watch of any debris or foreign material to avoid interference in charging. Next, connect the back of the smartwatch to the magnetic concave side of the charger. After a few seconds, the display will light up and indicate the charging progress.

Important - 1) Do not use a USB charger other than the one provided with this Aviator Smartwatch to charge the smartwatch. Otherwise, the circuit and watch may be damaged and the watch will not be charged. This will void the warranty of the smartwatch & the charger.

2) Do not charge any other device besides the Aviator smartwatch with this charging cable as it may cause a short circuit.

Easy Switch Strap (B)

The Aviator F-Series smartwatch AVSW9516* comes with an additional silicone band. This smartwatch contains two parts (watch body & strap). You can replace the strap by pressing the ear switch at the back of the strap towards the right or left.

Pairing

- Turn on the watch. Press & hold the lower pusher for 5 seconds until the smartwatch vibrates and the screen turns on.
- To bind the smartwatch to your App → turn on BT in your mobile, then open the AVIATOR Smart F Series App & click the 1st or 3rd tab at the bottom of the page.
- Click "Add Device" or "To add" and select your Aviator smartwatch from the scanning list, then follow the steps as prompted by your phone.
- Identify your device in your watch under Settings ⚙️ (Swipe down from the top of the dial display) → About → Version
- In your phone click "Pair" & "Allow" when prompted with the Pairing request (Pair with Aviator 9516*)
- If you do not get a prompt to pair the watch within 10 to 15 seconds of adding your watch to the app, please add it in your phone BT settings as follows –
 - a) Phone → Settings → BT → Aviator 9516* → Pair/ Allow
 - b) If this watch is not listed under your BT devices, activate it as follows-
Watch → Control center (Swipe down from the top of the dial display) → click  to change it to . This action will display the watch under the BT devices on your phone. Select your watch, listed as Aviator 9516* to complete the connection.
- Pairing Complete.

Smart Watch Features

Menu (Swipe right from the left of the dial display) - The main page of the menu will display the 5 most recently used features. Click on  at the bottom right to go to the main menu.

The menu has an extensive range of features including activity (step counter), sleep, heart rate, phone call, exercise, exercise records, blood pressure, SpO2, stock market, weather, messages, camera, music, breathing, voice assistant, timer, alarm, stopwatch, world time, flashlight, find phone, calculator, games and settings*.

*Settings include display, vibration, DND, low power mode, phone call (on/off, media audio, phone call reset), system (restart, power off, reset), About (Version & App download/ QR code) and Languages.

Phone Calls (Swipe left from the right of the dial display)
Calls can be made & answered on the smartwatch. Turn this feature on/ off in the Control center (Swipe down from the top of the dial display) → Settings ⚙️ → Phone call: on/ off. Alternatively, you can also press 📞 in the Control center to manage all audio control features like phone calls & music. Note - If your smartwatch does not connect the calls & asks to try again, pair it under your phone's BT. If it is still not recognized, click "reset" under settings ⚙️ → system, then pair it again. Ensure that your smartwatch is placed next to your phone.

Blood Pressure

Tap to start measuring your Blood pressure. The smartwatch & app can show the data of the last 7 times.

SpO2

Tap to start measuring your Blood Oxygen level. The smartwatch & app can show the data of the last 7 times.

Heart Rate

Tap to start measuring your heart rate. The smartwatch can also record your heart rate all day. In the app, under the 3rd tab → Others → Continuous Heart Rate or Full Day Heart Rate → frequency. You can also select a ceiling to warn you if your BPM reaches over this limit in the 3rd tab → Others → Heart Rate warning.

Activity (Step counter)

The smartwatch & app automatically tracks Steps taken. Scroll down for the number of steps, kcal, minutes, day & week-trend. Note – Movement stats reset at midnight.

Sleep

The smartwatch & app monitors the duration & quality of your sleep when you wear your device to bed.
Note – Sleep stats are recorded between 10pm & 8am. Stats reset to zero at 10pm.

Exercise & Exercise Records

Choose your sport from over 110 different sports to start recording. The last training recorded will be shown on the smartwatch & App main page (1st tab), whereas the exercise/ training records are shown in the App → 2nd tab.

Control center

(Swipe downwards from the top of the dial display)

The control center includes the date, sync indicator which turns grey when the app is disconnected, battery life icon, do not disturb (DND), battery saver, brightness, flashlight, media audio: phone/ watch, settings*, quick view & alarms. *Settings include display, vibration, DND, low power, phone call (phone, media audio, phone call reset), system (restart, power on/off, reset), About (version & App download/ QR code) and Language.

Stopwatch

Tap the screen control to start, pause or reset the stopwatch.

Music

After connecting the device, control your phone music player remotely through the smartwatch. Turn this feature on/ off in the Control center (Swipe down from the top of the dial display) → Settings ⚙ → Phone call → Media Audio: on/ off. Alternatively, you can also press  in the Control center to manage all audio control features like music & phone calls.

Camera

After connecting the device, you can control your phone camera remotely through the smartwatch.

Messages

(Swipe upwards from the bottom of the dial display) Sync incoming notifications from Whatsapp, Twitter, Facebook, Instagram, etc. The last 8 notifications can be viewed on the smartwatch only after it is synced to the app.

Voice Assistant

Press the screen to speak to your Phone's Voice assistant like Google Assistant, Alexa, Siri etc. The screen icon will change to indicate that the voice assistant is listening.

Breathing

You can choose among 2 breathing exercises (Stressed or Relaxed), depending on your need. Customize this exercise on your watch from 1-15 mins for either exercise.

Games

Choose from a list of 4 different games.

Reminders to move & to drink water

The smartwatch will vibrate to remind you to move and to drink water at regular intervals. Note: You can switch these features on/off in the app (3rd tab) → Others → Health.

Stock Market

Get constant updates of your selected top 6 stocks or currencies. To add a stock, enter the name or code in the App (3rd tab) → Stock Market → +. To remove a stock, swipe it from right to left → delete.

Find phone

Click on Find phone in your watch, if your phone is misplaced nearby. The phone will vibrate and set off an alarm. Press it again on the watch to stop this alarm.

Note – BT should be enabled on the phone for this feature to work.

Weather

Current weather and forecast of 7 days are shown on the Weather page.

Choose your city & temperature format in the App (3rd tab) → Others → Weather, to sync with your smartwatch.

SOS Emergency Help

- 1) To use this feature, turn it on in the 3rd tab -> others -> health -> SOS Emergency Help.
- 2) Next in the "Settings" of your phone, find & click the Emergency SOS, then add a contact under Emergency contacts.
- 3) The watch MUST be connected to BT and the  turned on in the control centre.
- 4) In case of an emergency, press the lower pusher repeatedly 5 times. Your phone will automatically call the emergency number listed in your country, as well as send an sms with your location to your emergency contact if you have assigned them.

World Time

Your watch can display the time of 6 different cities simultaneously. Add these cities of your choice in the App (3rd tab) -> World Time.

Alarm

Set up alarms on the smartwatch or app. The device will ring & vibrate when the alarm goes off. You can set up to 8 alarms.

Personalize dials

Personalize your watch by adding a dial of your own choice from your personal gallery. In the App (3rd tab) -> Watch Faces -> Edit -> swipe right on the dial faces until you reach the end -> + Choose from Album. You can see the download progress displayed on your watch screen.

Customize dials You can choose to customize the text & its position on your dial. In the App (3rd tab) -> Watch Faces -> Edit -> choose the position, text (below time - date, sleep stats, HR or steps) and the color of the text. Ensure that your watch is connected to the App and placed close to your phone during the entire transfer process. Do not close the App or turn off your watch or phone during the dial transfer.

Dual Time Zone Dials - Introducing these especially for the modern traveller to display a 2nd time zone alongside real-time updates. Stay stylish and informed no matter where you are, effortlessly keeping track of the time in two different time zones.

Cloud Dials You can also download additional dials from the cloud to give your Aviator Smartwatch a new look every day! Choose from over 110 dials to match your mood and style. In the App (3rd tab) → Watch Faces → swipe right on the dial faces until you reach the end → + Face gallery → select photo → Download. The new dial will be soon transferred to your watch and you can see the download progress displayed on your watch screen. Ensure that your watch is connected to the App and placed close to your phone during the entire transfer process. Do not close the App or turn off your watch or phone during the dial transfer.

Know your device

1. Using in Wet Conditions The device can withstand perspiration, drops of water when washing the face and very small amounts of moisture in daily activities.

Do not wear it when you are showering, swimming, diving, scuba diving, surfing, in saunas, when engaged in high-velocity sports, any water activities or in the rain. Do not use the watch button when the device is wet.

2. The smartwatch is susceptible to irreparable damage under the following circumstances:

- It is dropped, bumped, or encounters other impacts.

- It comes into contact with liquids including water, rain, soap, shower gel, detergent, perfume, lotion, oil or similar products.

- It is used in high-temperature and high-humidity environments including hot baths and saunas.

- Hot steam, smoke and other vapors can cause damage to the watch's sensitive sensors.

3. Heat Exposure Do NOT expose the smartwatch to direct sunlight or any other heat source. Smartwatches, like all other electronic devices, are designed to operate within certain temperature ranges. Prolonged exposure to direct sunlight or extreme heat can cause the device to overheat, potentially affecting its performance and safety. It can also cause the watch to get damaged.

IMPORTANT! Exposure to any of the aforementioned circumstances or conditions may damage the internal components and circuits of your smartwatch. This type of damage is irreparable and will void the warranty.

4. Using Quick View With Quick View you can check the time or messages from your phone on your smartwatch without tapping. Just turn your wrist towards you and the screen will appear for a few seconds. You can switch this function on/off in the smartwatch → Control centre (Swipe down from the top of the dial display)→  and also in the App → 3rd tab→ Others→ Quick View.

BATTERY

- > Battery percentage shown on the dials is an estimate and not an accurate representation. Battery percent is shown in increments of 20% from 0 through 100%.
- > The battery life of smartwatches, similar to mobile phones and all electronic devices highly depends on the usage of the product, where, the higher the usage, the faster the consumption of the battery. High usage of GPS, notifications and other power-intensive functions can reduce the battery life.
- > Do not use a USB charger other than the one provided with this Aviator Smartwatch to charge the smartwatch. Otherwise, the circuit and the watch may be damaged and the watch battery will not be charged. This will void the warranty of the smartwatch & the charger.

ATTENTION!

- > The smartwatch measurement results are for reference only and are not valid for any medical purpose. Please follow your doctor's instructions and do not rely on the smartwatch measurement results for self-diagnosis and treatment.
- > Some functions may vary from this manual depending on the software version installed on your smartwatch.
- > We reserve the right to modify the contents of this manual without prior notice.

General Info & Specifications

1. Environmental Conditions

Operating temperature: 14°F to 122°F (-10°C to 50°C)

Non-operating temperature: -4°F to 140°F (-20°C to 60°C)

2. Recycling and Disposal

It is the consumer's responsibility to properly recycle and dispose of the smartwatch along with its accompanying components. Do not dispose off the smartwatch with common household waste. It is considered electronic waste and should be disposed of at your local electronic equipment collection facility. For more information, please contact your local electronic equipment waste management authority or the retailer where you purchased the product.
